

ABINASH BEHERA

Full Stack Developer | Software Developer

Bhubaneswar, Odisha | +91 9337091334 | abinashbehera189@gmail.com | [GitHub](#) | [LinkedIn](#)

CAREER OBJECTIVE

Final-year Computer Science undergraduate specializing in Blockchain and Web Development, with hands-on experience building full-stack production-style applications using the Java/Spring Boot and React ecosystem, plus decentralized applications on Ethereum. Seeking a Full Stack Developer / Software Developer role to build scalable, secure, and user-centric software.

EDUCATION

Centurion University of Technology & Management, Bhubaneswar <i>B.Tech, Computer Science & Engineering (Specialization: Blockchain & Web Development)</i>	2023 - 2027 (Pursuing) CGPA: 8.8
Vikash Residential School <i>Higher Secondary (Science, with Computer Science)</i>	2021 - 2023 72.5%
SDA Higher Secondary School, Khordha <i>Secondary Education</i>	2013 - 2021 82.5%

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Solidity, C++, SQL
Frontend: React, Vite, HTML5, CSS3, Tailwind CSS, Axios, Ethers.js
Backend: Spring Boot, Spring Security, Node.js, Express.js, REST APIs, JWT
Databases: MySQL, MongoDB, SQLite, Redis
Blockchain: Ethereum, Solidity, OpenZeppelin, MetaMask, IPFS, ERC-20, ERC-721
Tools: Git, GitHub, Maven, Postman, Swagger, VS Code, Remix IDE, Cloudinary

PROJECTS

EETS - Food Delivery System (Enterprise-Level, Built During Internship) | *React, TypeScript, Vite, Spring Boot, MySQL, Redis, JWT, Razorpay, Twilio, Cloudinary, Google Maps API*

- Built a 4-portal platform (Customer, Vendor, Driver, Admin) with role-based authentication and JWT-secured REST APIs.
- Implemented OTP & Google login, restaurant/menu management, live order and driver tracking, and Razorpay payment integration.
- Used Redis caching to reduce repeated database load and improve API response times.

Blockchain Supply Chain Tracker | *Solidity, Ethereum, React, Ethers.js, MetaMask, IPFS, Pinata, ERC-721*

- Developed a decentralized traceability system modeling the Manufacturer -> Distributor -> Retailer -> Consumer workflow.
- Implemented NFT-based (ERC-721) digital product passports with QR-code verification and IPFS-backed product history.
- Designed a trust-score mechanism and role-based access control; planned AI-based anomaly detection and live map tracking.

Web3 Social Media DApp (Capstone Project) | *React, Solidity, Ethereum, IPFS, MetaMask*

- Built a decentralized social platform with wallet-based login, on-chain username registration, and IPFS image uploads.
- Implemented core social features: posts, likes, comments, user profiles, and a personalized feed page.

INTERNSHIP EXPERIENCE

Java Full Stack Development Intern - Centurion University of Technology & Management (SoET) | 2026

- Completed an intensive training program covering Core & Advanced Java, Hibernate, Spring Boot, SQL, Advanced JS/React, and Competitive Coding.
- Applied the skills gained to design and build the EETS Food Delivery System as a practical, enterprise-style capstone project.

CERTIFICATIONS

- 15-Day Hands-on Training on Python Programming - Centurion University, Center for Data Science & Machine Learning (Jun-Jul 2024)
- Course Completion Certificate, GeeksforGeeks - CUTM Training Program, Bhubaneswar Campus
- Mastering Web3 (Introductory Track) - UNIC Institute for the Future; Score: 100/100 (Apr 2026)
